

HUNTER FAMILY/ POWELL FAMILY INDOOR FACILITY

Providing a quality indoor batting facility to develop future champions.

The HSU Baseball team is back in swing with a brand-new practice facility! Functioning as a multipurpose 125' x 75' space with wall-to-wall turf and retractable cages, the Hunter Family/Powell Family Indoor Facility boasts an indoor bullpen, new pitching machines, L-screens, and more.

"We are extremely grateful for the Hunter Family/Powell Family Indoor Facility. This facility provides a tremendous opportunity for our current and future players. Because of the size of the facility, our baseball program

will be able to use this space in many different ways. Not only will the indoor space provide an opportunity to train during inclement weather conditions, it can also be utilized year-round. We can't wait to see the finished product," shared HSU Head Baseball Coach, Steve Coleman.

The team is eager to utilize this space and looks forward to the opportunities they will be provided through this project and your generosity.
